TESTING OPTICAL FIBRES

RESPONSE TO ELECTION OF SPECIES REQUIREMENT

Assistant Commissioner of Patents  
Washington, DC 20231

D ar Sir:

In response to the Election of Species Requirement dated January 14, 2003, the applicant hereby elects the Species of Embodiment I, with traverse. Claims 1-9 are directed to the elected species. Claims 1-7 are generic.

The Applicant respectfully requests withdrawal of the Election of Species Requirement. No unduly extensive or burdensome search would be required to examine the claims of the various species in the same application. MPEP §803 states:

"If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits even though it includes claims to distinct or independent inventions."

In the present case, the search for all pending claims together would not be burdensome, since the fields of search would likely overlap and pertinent art to the claims of the identified

species would likely be found while searching each of the inventions individually.

Moreover, from the standpoint of costs to the applicant involved in filing, issuance and maintenance fees relating to separate applications if the present requirement were maintained, it is clear that there is substantially more burden on the Applicant by imposing the present requirement than on the Patent Office if the requirement were withdrawn.

In addition, it is noted that to require the claims of the various species to issue in separate patents would result in inconvenience to the public by necessitating reference to more than one patent during searching, in order to review closely related subject matter.

Therefore, withdrawal of the election requirement is warranted.

Reconsideration and withdrawal of the election requirement are respectfully requested.

Date: January 31, 2003

Respectfully submitted,  
  
James E. Ledbetter
